IT'S THE VERY LATEST

PYRAMID ONLINE

Pyramid online is a web based system that provides tenants with secure access, via the Internet, to the transaction data that is held by their housing provider or for suppliers to access property based data.

Some of our customers have already implemented Pyramid Online. This is what they have to say:

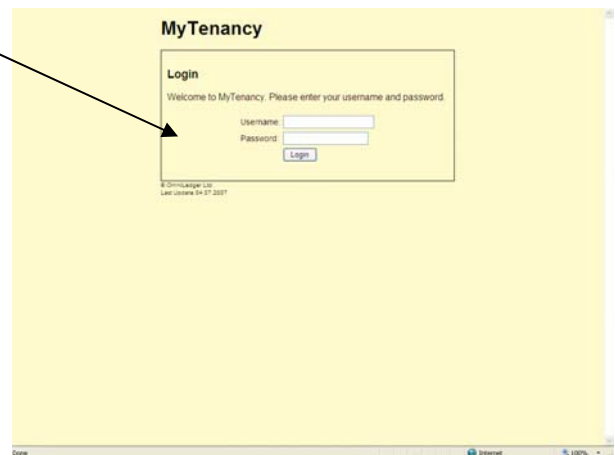

Graham Shellard, IT Manager at Linc-Cymru Housing Association says *“The Pyramid Online module is an ideal means of safely storing our asbestos certificates and sharing these with the Maintenance contractors with whom we work, wherever they are based within the South Wales area”.*

Lynne Shea, Finance Director, Colne Housing Society says *“Pyramid online has proved a winner with our residents. Rent statements can be viewed and queries resolved with the income management team much quicker. Repairs can be reported, appointments viewed, and work tracked from start to finish. This has cut down on the number of calls that customer services have to deal with on a daily basis. It’s all about our residents having access 24 hours a day from their home.*

- Security is provided in that the data is hosted off-site by OmniLedger and the data is updated at the end of each day.
- As Pyramid is a real time system there are no batch routines and every transaction processed is available, which means that Tenants have access to data that is never more than 24 hours old.

Security is based on the Tenant or Supplier having a secure log-on, a password and a Personal Identification code for added security.

Date	Transaction Type	Charges	Payments	Balance	Remarks
03/2004	B/Fund		1.00	1.00	Pre
07/04/2004	Week charge	62.97		61.97	Arr
