

OmniLedger are pleased to announce the award of a new contract to supply their fully Integrated Housing Management System to **Kings Barton Housing Association Ltd.**

Kings Barton is a small community based association located in the Bristol South West area. It was established in 1968 and deals with the housing needs of people aged 50 years and above.

The Association has 95 flats distributed over eight independent sites and are due to complete a further 20 units very soon.

In accepting the need for the Association's systems to become computerised, it took some eighteen months of extensive research to find a good quality fully integrated IT system.

The Association at the time looked at potential partnership arrangements as well as the purchase of stand alone systems and were very pleased to agree that OmniLedger provided the right solutions to serve an Association of our size. The price was reasonable and we are in the throes of installing the full system.

There are two part time staff working for the Association, one of which is Patricia O'Driscoll the General Manager who states "as well as the system being good the real bonus for the Association is the excellent back up received from the staff at OmniLedger and the helpline facility.

There is no doubt the OmniLedger Pyramid system will greatly assist the Association to continue to provide good quality affordable housing and an efficient and effective service to its residents."
