NORWICH HOUSING INVEST IN THE LATEST TECHNOLOGY FROM OMNILEDGER LIMITED

Norwich Housing Society has been in operation for over 65 years. Having decided to computerise their manual systems Norwich H.S. recently invested in OmniLedger's Pyramid Integrated Housing Management and Financial suite of applications.

"OmniLedger were chosen", states Nick Bagshaw, Director "because of the system's depth of integration and the amount of management information we can extract from the system."

Finance Manager, Tom Trett, believes that *"Pyramid will not only allow us to achieve our first objective – to provide our tenants with the best possible service, it will also ensure that tenants can continue to come into the office to pay their rents. Whilst other Associations are moving towards electronic collection systems, we felt that such a move was not necessarily for the benefit of the tenants."*

The Pyramid cashdesk prints directly onto our existing Rent Cards and updates the complete business suite immediately, leaving us with more time to talk to the tenant, rather than writing out paper records, and this was extremely important to us.

It would appear that OmniLedger are the only supplier that can offer a complete hardware and software package of services with a total absence of third party software.

"Having seen the system in operation at another Housing Association, we had no reservations about ordering the system. All the Pyramid users that we spoke to were happy with the system, but more importantly, were complimentary about the on-going service and support."
