

LONDON BASED SHIAN HOUSING ASSOCIATION SELECT OMNILEDGER

Shian is a community based Housing Association, which was established in 1989 catering for the general needs of primarily ethnic minority people in Hackney and neighbouring areas.

It became registered with the first Housing Corporation 5-year programme to promote and support the independent establishment of housing associations controlled by black and minority ethnic people.

The Association now works in the three London boroughs of Hackney, Haringey and Islington. By March 2000 Shian owned over 300 permanent homes with 27 hostel bedspaces and a further 100 dwellings managed on behalf of other organisations. There are additional dwellings in the committed development pipeline.

Leslie Laniyan, Managing Director of Shian Housing Association: "We looked at a number of systems and OmniLedger were the only supplier that could provide a comprehensive and fully integrated solution at the right price, without compromising the usefulness of the system."

Shian's purpose is to provide decent affordable social housing and relevant accompanying services in an effective, efficient and responsive manner, meeting the needs of primarily black and minority ethnic people from local communities.
